

## Pro Tips-The Journey of 1000 Plants Begins With One Seed

Grow What You Love-The easiest things to grow are the things you'll enjoy the most.

Start With One Seed & One Plant-If you're new and intimidated just pick one thing and focus on that.

Don't Get Discouraged-Keep going, it gets easier!

Use What You Have-You do not have to purchase new tools,products,or seeds every season.

Plant Your Flowers Before Your Fruits & Vegetables-You're going to want to attract all the beneficial pollinators you can.

Plant More Flowers Than You Think You'll Need-There is no such thing as too many flowers.

Have Fun In Your Lane: Focus On Growth Regardless-Garden envy is only a real thing, if you allow it to be!

A Spray Bottle Will Be Your Best Friend-Three sprays twice a day works wonders in the beginning.

You Don't NEED Special Soil-The soil you start with is the soil you'll end with.

If It Doesn't Grow: Plant More-That's the fun part about using seeds, more chances followed by more chances.

If Using Egg Cartons, Separate In Advance-You'll thank yourself later!

Label Label Label-"What did I plant here?" is never the question you want to have to ask

Read Seed Packets-This will answer almost every single question you'll have and more(emergence,depth,spacing,thinning,maturity..)

Find Your Growing Zone-Save time and money while setting yourself up for long term gardening success.
